Our school is implementing a voluntary program that promotes health and sustainability by encouraging kids to walk and bike to school.

Every day your child walks or bikes to school, they can walk under our ZAP and get credit toward fun prizes. The ZAP is a solar powered RFID reader - it reads the number on your child’s ZapTag (like a luggage tag that attaches to their backpack) and then records their trip on the internet. No personal information is recorded on the ZapTag - so privacy is protected.

As kids are rewarded for walking or biking each day, they reduce school traffic, develop a lifelong awareness of making responsible transportation choices, and become empowered to make a positive impact in their lives and the world.

To register your child’s tag and learn more about Boltage, go to www.boltage.org.

If you have questions, please contact Michael Kresko at 541-790-6400.

Our program kicks off on Monday, January 9, so please get your kids registered!
